MEMO TO FILE:

Re: Geokinetics, Inc.
Ut. Experimental Site #1
Sec. 2, T. 14 S., R. 22 E.
Uintah County, Utah

ACT/047/002

On Tuesday September 21, 1976, Ron Daniels, Pat Driscoll, and myself visited the Geokinetic's Experimental Site to check on their progress.

The operation has been steadily progressing as evidenced by more equipment and residences being present than were on the site in March, 1976. The personnel on the site were busy with an experiment and very briefly explained some general attributes of their in-situ extraction process which are not strictly confidential.

At this time the field research is expected to continue through this coming winter.
